ABOUT ME

It's a pleasure to introduce myself: I'm **Emanuele**, a **Computer Engineer** with a lifelong passion for **technology** and **computers**. During my studies, I deepened my expertise in **software development** and developed a strong interest in **cybersecurity**.

Currently, I work as a **Full Stack Developer** at **Elca Informatique SA**, where I have had the opportunity to enhance my expertise primarily in backend development with **Java** and **Spring**, focusing on designing cloud-optimized **microservices architectures**. Additionally, I have expanded my knowledge in the **DevOps** field by creating and managing development and production environments, mainly on the **Azure** platform, as well as handling CI/CD pipelines with **GitHub Actions**.

EDUCATION

UNIVERSITÀ DEGLI STUDI DI PALERMO | *Computer Engineering* 2018 – 2021

- Electronic Computers C.I.
- Databases and Information Systems
- Algorithms and Data Structures
- Web and Mobile Programming
- Software Engineering

EXPERIENCE

ELCA INFORMATIQUE SA Palermo
Full Stack Developer Apr 2024 – Now

- **Reservation System Development:** Contributed to the development of a reservation system using Angular for the frontend and Spring for the backend. I created new components for the frontend, managed the audit, and generated Excel reports in the backend. Additionally, I developed frontend tests with Jest, participated in the implementation of end-to-end tests with Cypress, and improved the DevOps pipelines, transitioning from Jenkins to GitHub Actions.
- **Swiss Pension Management System:** Worked on a management system for Swiss pensions with a Spring backend and a JavaFX frontend. I primarily focused on bug fixing for the frontend and the creation of tests for the backend using Mockito.

PROGESI S.P.A. Rome
Software Developer Aug 2023 – Mar 2024

- **Military Software Development Project:** I was actively involved in the development of a desktop application in **Java** for ground military operations, specializing in collaboration with the main client, **Leonardo S.p.A.**. My role encompasses the design and implementation of tailor-made software solutions to address the unique challenges of this context.
- **Military Cloud Service Installation:** I played a crucial role in the support and configuration of an advanced **Cloud service** within a military center, meticulously managing **web servers, proxies, and databases**. Ensuring an efficient installation, I ensured that the service fully met the specific needs of the military environment in which it was implemented.

These experiences have significantly enriched my professional skills, showcasing my ability to tackle complex technical challenges and manage projects in highly sensitive environments.

JOIN BUSINESS MANAGEMENT CONSULTING

Rome

Cyber Security Analyst

May 2022 – Aug 2023

- **Banking Applications Analysis:** I conducted an analysis of a well-known banking group's applications, inventorying both internal and external ones and assessing logical access compliance with corporate policies. Managing the project independently, I enhanced my skills in Excel and PowerPoint through periodic reports and presentations.
- **Security Monitoring:** I performed daily analyses of Netskope logs to detect anomalous access and supported the SCC and SOC teams in security management.

SOLVING TEAM

Rome

Full Stack Developer course

Feb 2022 – May 2022

- I participated in a Full Stack Developer course organized by the company. The course started with **Java** concepts that I had already covered at university and progressed to building a monolithic backend in **Spring**, implementing **CRUD** functionality and user management. Additionally, we were introduced to **frontend development** using **Angular**, gaining hands-on experience in creating and integrating a simple user interface. During the course, I also explored **DevOps concepts**, including the use of **Docker**. This experience provided me with a solid foundation in both **backend and frontend development**, as well as an understanding of DevOps practices.

S K I L L S

Technical Proficient in **Java, Python, C, JavaScript, TypeScript, SQL, and Bash**. Experience with **Spring Boot, Node.js** and **Angular**. Skilled in **microservices architecture, REST APIs**, and **cloud-optimized solutions**. Knowledge of **DevOps practices**, including **Docker, Kubernetes, GitHub Actions, Azure DevOps**, and **CI/CD** automation. Database experience with **PostgreSQL** and **MySQL**. Familiar with **Linux administration, network security**, and **penetration testing**.

Language **Italian:** Native. **English:** B2 (working proficiency).

Interests Passionate about **cybersecurity, open-source development**, and **self-hosting**. In my free time, I dedicate myself to creating projects with my group of friends and developing personal programs to optimize my life. Additionally, I have a passion for **numismatics** and find great satisfaction in team sports, such as **football**.
