ABOUT ME

Computer Engineer with over **4 years of professional experience in IT**, **3 of them in software development** as a **Full Stack Developer**, from **Java/Spring** backends to data pipelines in **Python**. Experience with microservice architectures, data platforms (**MongoDB**, **Kafka**) and **DevOps** practices on **Azure**, from environment management to CI/CD pipelines. Background in **cybersecurity** and creator of the winning project of the internal company hackathon, an **AI-based HR portal**.

EXPERIENCE

ELCA INFORMATIQUE SA

Palermo

Full Stack Developer | *Associate Engineer* → *Engineer*

Apr 2024 – Present

- **Data Hub Platform (Current Project):** Contributing to a data hub that centralizes and distributes data across the different business systems of an insurance client. Development of **ETL** pipelines in **Python** and **Java** on a **MongoDB** data layer with **Kafka** streaming, on **Azure** infrastructure.
- **Management System Migration:** Automation of data synchronization between the legacy management system (projects and hours) and the new company **ERP** system, as part of a gradual migration, using custom **Python** scripts.
- **Internal HR Innovation Hackathon (Winner):** Project idea, team selection and lead on the main product decisions for an **AI-based HR portal** for CV screening, candidate profiling and automatic generation of technical tests. Development of the **Python (FastAPI)** backend, the REST API and the CI/CD pipeline; presentation of the project (live demo, then a narrated video for the company final); **first place** at office level, then at company level across all Elca offices.
- **Swiss Pension Management System:** Maintenance and stabilization of a pension management suite (**Spring** backend, **JavaFX** frontend) – bug fixing and backend testing with **Mockito**, later extended to task analysis and support for the wider team and the business analysts.
- **Online Hut Reservation System (Swiss Alpine Club | [Link](#)):** Development and maintenance of the core features of a multi-language booking platform, used in more than **500 Alpine huts** (Gold award "**Best Software Projects 2025**", Cloud Native Solutions category) – **Angular** frontend, **Spring** backend. New components, audit management and Excel report generation; **Jest** and **Cypress** test suites, performance testing with **JMeter**, evaluation of a migration from Docker to Buildpacks, and migration of the CI/CD pipeline from **Jenkins** to **GitHub Actions**.

PROGESI S.P.A.

Rome

Software Developer

Aug 2023 – Mar 2024

- **Military Software Project:** Development of a desktop application in **Java** for ground military operations, working closely with the main client, **Leonardo S.p.A.**; design and implementation of custom software solutions for a highly specialized operational context.
- **Military Cloud Service Installation:** Configuration and support of an advanced cloud service for a military center, managing **web servers**, **proxies** and **databases** end-to-end, meeting the strict security and reliability requirements of the sector.

I hereby authorize the use of my personal data in accordance with the GDPR 679/16 - "European regulation on the protection of personal data".

JOIN BUSINESS MANAGEMENT CONSULTING

Rome

Cyber Security Analyst

May 2022 – Aug 2023

- **Banking Applications Analysis:** Independent management of a complete logical access compliance analysis on the application portfolio of a major banking group, reviewing internal and external applications against the company security policy; development of custom **Python** tools with a graphical interface to automate the analysis, with regular reporting of the results to management through Excel/PowerPoint presentations.
- **Security Monitoring:** Daily analysis of **Netskope** logs to detect anomalous access, supporting the **SCC** and **SOC** teams in security incident management.

SOLVING TEAM

Rome

Full Stack Developer Course

Feb 2022 – May 2022

- Completion of an intensive Full Stack Developer training program: development of a monolithic **Spring** backend with CRUD features and user management, development of an **Angular** frontend, and introduction to **DevOps** fundamentals including **Docker** – the technical base for all the following experiences.

EDUCATION

UNIVERSITY OF PALERMO

Bachelor's Degree in Computer Engineering

2018 – 2021

SKILLS

TECHNICAL

- **Languages:** Java, Python, TypeScript, JavaScript, SQL, Bash, C.
- **Frameworks and Libraries:** Spring Boot, Angular, FastAPI.
- **Data and Messaging:** PostgreSQL, MySQL, MongoDB, Kafka.
- **Cloud and DevOps:** Azure, Docker, Git, GitHub Actions, Azure DevOps, CI/CD, Linux administration.
- **Testing:** JUnit/Mockito, Jest, Cypress, JMeter.
- **AI:** integration of LLMs into applications and automations through APIs, prompt engineering, local model deployment; daily use of AI coding tools (Claude Code, GitHub Copilot).
- **Architecture and Methodologies:** microservices, REST API, ETL pipelines, cloud-native solutions, work in Agile teams (daily, sprint planning).

LANGUAGES

- **Italian:** Native.
- **English:** B1 (intermediate).

INTERESTS

Development of **personal** and **open-source projects**, with a particular interest in **automation** and **self-hosting** (self-managed home infrastructure). Speaker at the **Career Day** of the University of Palermo (2025), with a company presentation and a live technical demo. In my free time, **numismatics** and **football**.
